NATURAL EXFOLIANTS

Suitable for beauty and personal care applications.

Background:

Natural exfoliants help to gently polish away rough and dead skin. Each exfoliant varies in the degree of exfoliation that it offers. Our nut and seed meals, for instance, provide moderate to aggressive exfoliation while also imparting the nutritive benefits of the natural oil content contained in the meal. Fruit fibers provide mild exfoliation and can be used in facial products or products for sensitive skin types. Coarser grains, such as salts, sugars and pumice are best suited for hands and feet.

Praan Naturals supplies a growing range of premium quality organic and conventional natural exfoliants that are suitable for use within facial, hand and body scrubs, polishes, soaps and other skin care formulations:

- **Fruit Seeds and Fibers**
- **Jojoba Wax Beads**
- **Nut and Seed Meals**
- **Salts**
- **Sugars**

FRUIT SEEDS AND FIBERS

Our natural, cosmetic grade fruit seeds are prepared by isolating the seeds from the dried fruit pulp and then carefully milling and sterilizing them. This process allows them to be used in skin care formulations without the chance of contamination. Fruit seeds are a visually eye catching addition to skin care formulations. They are suitable for use in viscous applications such as shower gels or where aggressive exfoliation is sought.

Fruit fibers are prepared by drying natural fruit pomace and then carefully sifting and milling it to a fine powder. Fruit fibers contain the natural fibrous components of the fruit and are ideal for use both as a gentle exfoliant and as a natural colorant within skin care formulations.

JOJOBA WAX BEADS

Our 100% natural pure jojoba wax beads provide gentle exfoliation without leaving microlacerations on delicate skin. These soft, tiny, colorful spherical beads are superior to ground nut shells and pumice powders when used in gentle exfoliation products for the face and body. They are perfect for use within scrubs, body washes and soaps.
