

Ethically Sourced Ingredients

FRUIT SEEDS AND FIBERS

Fruit Fibers are prepared by drying natural fruit pomace and then carefully sifting and milling it to a fine powder. Fruit Fibers contain the natural fibrous components of the fruit and are ideal for use both as an exfoliant and as a natural colorant within skin care formulations.

Our natural, cosmetic Fruit Seeds are prepared by isolating the seeds from the dried fruit pulp and then carefully milling and sterilizing them. This process allows them to be used in skin care formulations without the chance of contamination. Fruit Seeds are a visually eye catching addition to skin care formulations. They are suitable for use in applications where a medium degree of exfoliation is sought.

Blueberry Fruit Fiber
Cranberry Fruit Fiber
