

FLORAL WAXES

Floral waxes are solid, aromatic plant waxes that are obtained during the production of floral concretes and absolutes. Floral waxes are comprised of the natural wax and precious aromatics present within the botanical that they are derived from. These waxes hold many of the benefits of the botanical including the moisturizing phospholipids. No additional waxes or fragrances are added.

Floral wax makes a divine, exotic addition to creams, balms and lotions. The wax lends thickness and a beautiful aroma.

Recommended Usage Rate: up to 10%.
